EXPERIENCE

Frontend Developer

Ellos Group

Feb 2021 - Present

- Deliver high-quality, robust production code for the three E-commerce frontend web apps
- Collaborate with teams of developers, designers, and product owners to develop responsive and user-friendly web features
- Translate design wireframes and mockups into clean, efficient, and maintainable code using Vue, Nuxt, Typescript, Nodejs, and Stylus
- Maintain and improve the existing codebase including taking the initiative to develop a frontend utility library to decrease code duplication across frontend web applications
- Actively participated in code reviews, providing constructive feedback and suggestions to enhance overall code quality and maintain consistency.

Teaching Assistant

Gothenburg and Chalmers Universities

Nov 2020 - Dec 2021

- Supervised the coding sessions, where students were divided into small groups and solved coding challenges together
- Assisted the students with their assignments and answered their questions.
- Helped the students to understand the course material and the concepts of programming

EDUCATION

BSc, Software Engineering and Management

University of Gothenburg

Sep 2019 - Sep 2022

Courses: Object-oriented Programming, Requirements & User Experience, Data Management, Data structure & Algorithms
